EXAMINER'S AMENDMENT

1.   An examiner's amendment to the record appears below. Should the changes and/or

additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the

payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with

Gregg Jansen on 12/13/2006.

The application has been amended as follows:

Claim 14, line 1, '11' has been replaced with --17--.

Claim 15, line 1, '11' has been replaced with --17--.

Claim 17, line 3, 'an external' has been replaced with --the ambient--.

Claim 18, line 3, 'an external' has been replaced with --the ambient--.

2.   The following is an examiner's statement of reasons for allowance: the prior art discloses

a vacuum cleaner duct with a bypass tube connected thereto and an airflow sensor positioned

within the bypass tube AND an airflow sensor having a first and second temperature-dependent

element, a bridge resistor and a heater element HOWEVER fails to disclose or fairly suggest the

sensor being configured to generate a normal voltage differential range when airflow is within a

predetermined normal airflow range, to generate a an input blockage voltage differential range

when airflow is greater than the predetermined airflow range and to generate an output blockage

voltage differential range when airflow is less that the predetermined normal airflow range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
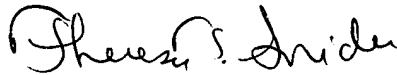

Conclusion

3.　　The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Egami et al. and Abe et al. disclose an airflow sensor having two temperature dependent elements, a bridge and a heater. Bowman discloses an airflow sensor that correlates air velocity to the generation of voltage.
